WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make four. Cut 220 x 220 mm from 10 mm plate; square; deburr.
Four 18 mm holes on a 160 mm square: 30 mm in from each edge.
Galvanize after drilling, or touch up with zinc-rich paint.
Fit: lies on the slab; the post stands on its centre between two
base cleats; the four M16 anchors pass through cleat and plate.
Use the drilled plate as the template for the slab holes.
Check: the plate sits flat on the slab without rocking; pack with
steel shims or bedding grout if the slab is out of level.
