**WHERE IT GOES**

This part in colour, its neighbours in grey

**HOW TO MAKE IT AND HOW IT FITS**

Make eight. Cut 46 mm lengths of 50 x 50 x 5 angle; deburr.
Upright leg (goes on the post): one 11 mm hole on the middle of the length, 28 mm below the top face of the flat leg.
Flat leg (goes under the beam): one 9 mm hole on the middle of the length, 27.5 mm out from the back of the upright leg.
Fit: one cleat on each side face of the post top, the flat leg's top face flush with the post's square-cut top, pointing away from the post. One M10 bolt through both cleats and the post; one M8 bolt up through each flat leg into a rivet nut in the beam's underside.
Check: a straight edge across the post top touches both cleats.
