WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make ten from 50 x 50 x 5 angle: four 40 mm long (end beams) and six 30 mm long (four for the purlins, two for the bearer).
Each leg: one 9 mm hole on the middle of the length, 25 mm out from the back of the other leg.
Fit: one leg flat on the face of one tube, the other leg flat on the face of the tube it meets; one M8 bolt through each leg into a rivet nut in that tube. Drawn: rear right end beam corner.
Check: both legs sit flat on their faces with the bolts in.
