WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make two. Cut 340 mm of 40 x 6 flat bar; round the corners.
Positions from the street end, on the centre line of the 40 mm face:
two 11 mm holes at 230 and 280 mm, countersunk on the outer face for M10 countersunk bolts (through the post);
two 5 mm holes at 40 and 300 mm, tapped M6 (enclosure screws).
Fit: flat on the outer side face of the rear right post, level, centred 1,520 and 1,780 mm up; the bolts' heads must sit flush so the enclosure's back lies flat on both rails.
Check: a straight edge across both rails touches all along.
