WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make two. Cut 60 mm lengths of 50 x 50 x 5 angle; deburr.
Flat leg: one 11 mm hole on the middle, 32 mm out from the back of the upright leg.
Fit: on the slab, upright leg touching the tank at its foot, on the canopy side of the tank, the two cleats 70 degrees apart round the tank. One M10 anchor each.
Check: the tank cannot slide toward the canopy centre.
